

Problem.

- Give a pseudocode for a *recursive* algorithm that takes an array A (possibly empty) of integers and returns the sum of all elements in A . If you feel your pseudocode is unclear, you may provide a *short* explanation of your pseudocode (1-2 sentences long).
- Give a pseudocode for a *recursive* algorithm that takes a linked-list L (possibly empty) of integers and returns the sum of all elements in A . If you feel your pseudocode is unclear, you may provide a *short* explanation of your pseudocode (1-2 sentences long).
